

# Microsoft 365 Architecture Cheat Sheet

Component	What it Does	How to Manage
Identity & Access (Azure AD / Entra ID)	Identity, SSO, MFA, Conditional Access	Entra Admin Center, PowerShell
Exchange Online	Email, Calendars, Tasks, eDiscovery	Exchange Admin Center, PowerShell
SharePoint Online	Document mgmt, Intranet, Metadata, Sites	SharePoint Admin Center, PnP PowerShell
Microsoft Teams	Chat, Meetings, Calling, Hub for SPO/Exchange	Teams Admin Center
OneDrive for Business	Personal file storage, sync, restore	SharePoint/OneDrive Admin Center
Power Platform	Apps, Automation, Analytics, Chatbots	Power Platform Admin Center
Security & Compliance (Microsoft Purview)	DLP, Retention, Labels, eDiscovery	Purview Compliance Portal
Endpoint Management (Intune / Endpoint Manager)	Device & app mgmt, patching, compliance	Intune Admin Center
Microsoft Graph API	Unified API for all M365 data	Azure AD App Registrations, Graph Explorer

Arrows & Dependencies: Teams relies on SharePoint, OneDrive, Exchange, secured by Entra ID. Power Platform extends across all services. Purview overlays compliance. Graph API unifies integration.
